DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, 6-8, and 11, drawn to an apparatus and method for forward beamforming in a base station, classified in class 455, subclasses 73, 561, and 562.

R.V.G.

- II. Claims 5, 9-10, and 12, drawn to a feedback apparatus and method of a terminal for supporting a base station using an array antenna to perform a forward beamforming, classified in class 375, subclass 349.

M. Gk

Inventions 1 and 2 are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention 1 has separate utility such as a base station transmitter, and invention 2 has utility as a mobile terminal. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group 1 is not required for Group 2, restriction for examination purposes as indicated is proper.
